

2nd BiH WATER CONGRESS

Sarajevo —————
07th and 08th November 2019.
Hotel Holiday

supported by:

 Ministry of Foreign Trade and Economic Relations of BiH

CALL

The Association of Consulting Engineers of Bosnia and Herzegovina (ACE BiH) is organising the Second BiH Water Congress.

The First BiH Water Congress held on October 27th and 28th 2016 and organised by the Association of Consulting Engineers of Bosnia and Herzegovina (ACE BiH), was attended by 350 participants from relevant institutions. The objective was to clearly recognise the water of BiH as the “driver” of growth in the energy, industry, agriculture and tourism sectors, of improvements in urban and rural life and in all other sectors.

Approximately 200 authors from BiH, Croatia, Slovenia, Austria, Germany, the Netherlands, Sweden, England and Singapore prepared and presented 85 papers. Water has been high on the list of priorities of the European Union and in the focus of its institutions for some time. Legislation at both the EU and national level is very detailed. However, risks are still growing, hence a framework “Water Mission” programme is already under preparation for the next ninth EU FP9 scientific programme. Thus, in the light of climate change and other factors, knowledge, research and innovation are expanded and deepened as the only response to dealing with the water crisis.

For the seventh consecutive year the World Economic Forum at Davos has qualified the water crisis as one of the five major social risks to stability in the world. The water crisis is not only happening in parts of Africa or Asia or in under development parts of the world, the water management crisis is especially dangerous in developed regions. In the European Commission’s questionnaire issued to Bosnia and Herzegovina in December 2016 to assess its readiness to join the EU, water is addressed in details in compliance with the situation in EU member countries. Answering the questionnaire through the coordination mechanism was a task of utmost significance and complexity for institutions in Bosnia and Herzegovina – from the municipal, cantonal, entity and district to the state level.

The clarification requests were formulated from an engineering perspective: numbers, percentages, descriptions of procedures, clarification of jurisdictions and capabilities of institutions etc. were requested. As for the environment and climate change, and water in particular, the questions pertain to effective implementation of adopted strategies and plans, especially regarding the availability and quality of drinking water and waste water treatment, as well as the transposition and application of EU’s Strategic Environmental Assessment Directive. The questions and sub-questions actually present guidelines for the required reforms, endeavours and actions to transform the BiH society and economy in accordance with European standards and practices.

The Second BiH Water Congress is going to be dedicated to the European path of BiH in the area of water, as well as to all other areas related to water. The intention is to consider how to “open” the water sector towards other sectors in order to involve them in solving “water” issues; and vice versa, how to proactively involve the water sector in visions, strategies, development plans and current events in other sectors related to water.

Water is a medium enabling Bosnia and Herzegovina and its neighbours, as well as the entire region of South - East Europe, to expedite an integral development of practically all social and economic components.

The Second Congress is going to be held in November 07 and 08 2019.
The Organisation Board is looking forward to your participation in the Congress.

Chairman of ACE BiH Professor Ešref Gačanin, PhD

• congress topic
